GET PROFESSIONALLY SUPPORTED BABEL

Babel is a JavaScript compiler.

Use next generation JavaScript, today.

Put in next-gen JavaScript

```
[let yourTurn = "Type some code in here!";]
```

Get browser-compatible JavaScript out

```
var yourTurn = "Type some code in here!";
```

[Check out our REPL to experiment more with Babel!](#)

Welcome!

We're currently just a small group of volunteers that spend their free time maintaining this project. If Babel has benefited you in your work, becoming a contributor might be a great way to give back.

Learn more about Babel by reading the get started guide or watching talks about the concepts behind it.

Support the Team

Babel is helping shape the future of the JavaScript language itself, being used at companies like Facebook, Google, Netflix, and hundreds more. Your donation will help cover expenses like attending TC39 (the committee that specifies JavaScript) meetings and will directly support the core team developers to continue working on improving Babel.
