package-lock.json	update readme	a month ago
package.json	add micromatch to dependencies	a month ago

README.md

eslint-plugin-treeshaking

Installation

You'll first need to install [ESLint](#):

```
$ npm i eslint --save-dev
```

Next, install `eslint-plugin-treeshaking`:

```
$ npm install git+ssh://git@github.com:silltho/eslint-plugin-treeshaking.git
```

or

```
$ npm install eslint-plugin-treeshaking --save-dev
```

Note: If you installed ESLint globally (using the `-g` flag) then you must also install `eslint-plugin-treeshaking` globally.

Usage

Add `treeshaking` to the plugins section of your `.eslintrc` configuration file. You can omit the `eslint-plugin-` prefix:

```
{
  "plugins": ["treeshaking"]
}
```

Then configure the rules you want to use under the rules section.

```
{
  "rules": {
    "treeshaking/rule-name": 2
  }
}
```

Supported Rules

- `empty-imports`
- `entry-point-sideeffects`
- `named-exports-sideeffects`
