Supporting Vue.js

Vue.js is an MIT-licensed open source project. It's an independent project with its ongoing development made possible entirely thanks to the support by these awesome [backers](#). If you'd like to join them, please consider:

- [Become a backer or sponsor on Patreon.](#)
- [Become a backer or sponsor on Open Collective.](#)
- [One-time donation via PayPal or crypto-currencies.](#)

What's the difference between Patreon and OpenCollective?

Funds donated via Patreon go directly to support Evan You's full-time work on Vue.js. Funds donated via OpenCollective are managed with transparent expenses and will be used for compensating work and expenses for core team members or sponsoring community events. Your name/logo will receive proper recognition and exposure by donating on either platform.

Introduction

Vue (pronounced `/vjuː/`, like view) is a **progressive framework** for building user interfaces. It is designed from the ground up to be incrementally adoptable, and can easily scale between a library and a framework depending on different use cases. It consists of an approachable core library that focuses on the view layer only, and an ecosystem of supporting libraries that helps you tackle complexity in large Single-Page Applications.

Browser Compatibility

Vue.js supports all browsers that are [ES5-compliant](#) (IE8 and below are not supported).

Ecosystem

| Project | Status | Description |
|-------------------------------------|---|---|
| vue-router |  v3.0.1 | Single-page application routing |
| vuex |  v3.0.1 | Large-scale state management |
| vue-cli |  v2.9.6 | Project scaffolding |
| vue-loader |  v15.2.6 | Single File Component (<code>*.vue</code> file) loader for webpack |
| vue-server-renderer |  v2.5.17 | Server-side rendering support |
| vue-class-component |  v6.2.0 | TypeScript decorator for a class-based API |
| vue-rx |  v6.0.1 | RxJS integration |
| vue-devtools |  v4.1.4 | Browser DevTools extension |

Documentation

To check out [live examples](#) and docs, visit [vuejs.org](#).

Questions

For questions and support please use the [the official forum](#) or [community chat](#). The issue list of this repo is **exclusively** for bug reports and feature requests.

Issues

Please make sure to read the [Issue Reporting Checklist](#) before opening an issue. Issues not conforming to the guidelines may be closed immediately.

Changelog

Detailed changes for each release are documented in the [release notes](#).
